The Equifax Data Breach: What to do.

Here are some steps to take to help protect yourself after a data breach:

- Check your credit reports from Equifax, Experian, and TransUnion — for free — by visiting annualcreditreport.com. Accounts or activity that you don't recognize could indicate identity theft.
- Visit IdentityTheft.gov to find out what to do.
- Consider placing a credit freeze on your files. A credit freeze makes it harder for someone to open a new account in your name.
- Monitor your existing credit card and bank accounts closely
- Consider placing a fraud alert on your files. A fraud alert warns creditors that you may be an identity theft victim and that they should verify that anyone seeking credit in your name really is you.
- File your taxes early — as soon as you have the tax information you need, before a scammer can file. Tax identity theft happens when someone uses your Social Security number to get a tax refund or a job.
